

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed, to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion,

as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

- I. *Observations of the Second Comet of 1822, made at Rio de Janeiro. By Lieutenant (now Captain) WILLIAM ROBERTSON, R.N. Communicated in a Letter to Captain BASIL HALL, F.R.S.* . . . . . page 1
- II. *On the performance of Fluid Refracting Telescopes, and on the applicability of this principle of construction to very large instruments. By PETER BARLOW, Esq. F.R.S. Cor. Mem. Inst. of France, of the Imperial Academy of St. Petersburg, &c. &c.* . . . . . 9
- III. *Researches in Physical Astronomy. By JOHN WILLIAM LUBBOCK, Esq. V.P. and Treas. R.S.* . . . . . 17
- IV. *On the Transient Magnetic State of which various Substances are susceptible. By WILLIAM SNOW HARRIS, Esq. Communicated by DAVIES GILBERT, Esq. V.P.R.S.* . . . . . 67
- V. *On the Nature of Negative and of Imaginary Quantities. By DAVIES GILBERT, Esq. V.P.R.S.* . . . . . 91
- VI. *On the probable Electric Origin of all the Phenomena of Terrestrial Magnetism; with an illustrative Experiment. By PETER BARLOW, Esq. F.R.S. Cor. Mem. Inst. of France, of the Imperial Academy of St. Petersburg, &c. &c.* . . . . . 99
- VII. *On the Equilibrium of Fluids, and the Figure of a Homogeneous Planet in a Fluid State. By JAMES IVORY, A.M. F.R.S. Instit. Reg. Sc. Paris. Corresp. et Reg. Sc. Götting. Corresp.* . . . . . 109

- VIII. *On a simple Electro-chemical Method of Ascertaining the Presence of different Metals, applied to detect minute quantities of Metallic Poisons.* By EDMUND DAVY, F.R.S. M.R.I.A. &c. Professor to the Royal Dublin Society . . . . . page 147
- IX. *On the Chemical Action of Atmospheric Electricity.* By ALEXANDER BARRY, Esq. F.L.S. Communicated by JOHN GEORGE CHILDREN, Esq. Sec. R.S., &c. &c. . . . . 165
- X. *An Account of Operations carried on for ascertaining the Difference of Level between the River Thames at London Bridge and the Sea; and also for determining the Height above the Level of the Sea, &c. of intermediate Points passed over between Sheerness and London Bridge.* By JOHN AUGUSTUS LLOYD, Esq. F.R.S. F.R.G.S. & F.S.A. . . . . 167
- XI. *On the Variable Intensity of Terrestrial Magnetism, and the Influence of the Aurora Borealis upon it.* By ROBERT WERE FOX. Communicated by DAVIES GILBERT, Esq. M.P. V.P.R.S. . . . . 199
- XII. *Description of a Graphical Registrar of Tides and Winds.* By HENRY R. PALMER, Civil Engineer. Communicated by JOHN WILLIAM LUBBOCK, Esq. V.P. and Treas. R.S. . . . . 209
- XIII. *On the Errors in the Course of Vessels, occasioned by Local Attraction; with some Remarks on the recent Loss of His Majesty's ship Thetis.* By PETER BARLOW, Esq. F.R.S. Cor. Mem. of the Inst. France, Imp. Acad. Sciences St. Petersburg, Acad. Sciences Brussels, &c. &c. . . . 215
- XIV. *On the Meteorological Observations made at the Apartments of the Royal Society, during the Years 1827, 1828, and 1829.* By J. W. LUBBOCK, Esq. V.P. and Treas. R.S. . . . . 223

# APPENDIX.

*Meteorological Journal kept at the Apartments of the Royal Society, by order of the President and Council.*

The PRESIDENT and COUNCIL of the ROYAL SOCIETY adjudged the  
ROYAL MEDALS for the year 1830 as follows :

---

A Royal Medal to DAVID BREWSTER, LL.D., Fellow of the Royal Society, for  
his Communications to the Royal Society on the Polarization, and other Properties, of Light.

A Royal Medal to M. BALARD, of Montpellier, for his Discovery of Brome.
